

LogPoint in short

THE LOGPOINT VISION IS
TO BE THE GLOBAL LEADER
IN INTERPRETING MACHINE
DATA AND TRANSLATING
IT INTO BUSINESS VALUE

LogPoint. A European SIEM Pioneer.

LogPoint is a Scandinavian company specializing in SIEM. The company headquarter is located in Copenhagen, Denmark, and we have sales- and support offices in Sweden, Germany, United Kingdom and France.

Wait. SIEM? What is That?

SIEM is short for Security Information and Event Management. A SIEM solution collects logs from all the devices in a business' infrastructure – from applications to servers to switches, routers and mobile devices – and translates these logs into a common language enabling correlation and analysis of key events.

What is LogPoint Used For?

The scalability of the LogPoint solution means that it can be tailored to different needs.

The common denominator for our customers for selecting LogPoint is the solution's ability to assist in:

- Protecting business assets
- Reducing security risks
- Sharpening insight
- Lowering costs
- Delivering business value
- Optimizing compliance
- Improving operations
- Enabling proactivity

How Can LogPoint Benefit My Enterprise?

With LogPoint's SIEM solution, you can capture incidents on your systems – standard as well as proprietary – before they become a threat to your business foundation. Among other things, the solution enables you to:

EAL3+ Certified Solution

LogPoint is the only European EAL3+ certified SIEM solution. This certification testifies that the LogPoint software is secure on one of the highest levels possible. This means LogPoint can be utilized worldwide by NATO organizations, law enforcement, military and critical infrastructure providers.

- Obtain a real-time overview of network data – avoiding service degradation and allowing new insights
- Detect undesirable network behavior and investigate incidents through data enrichment
- Easily adhere to compliance requirements (ISO2700x, GDPR, SOX, HIPAA, PCI, GPG13 etc.)

The built-in intelligent log analysis engine automatically detects and notifies of all critical incidents on your systems. The events monitored can be very diverse and can include: an ongoing attack, a compromised system, a system breakdown, user authentication issues and much more.

Overall, the solution allows you to optimize your organization's potential and protect valuable assets.

How User-Friendly is LogPoint?

Filtered and carefully correlated real-time results are displayed in out-of-the-box dashboards that are easy to manage and can be configured based on the specific roles and responsibilities of each user. Further, LogPoint includes a wide range of reporting templates allowing you to easily demonstrate e.g. compliance. You are of course also able to create reports from scratch using the intuitive Report Wizard.

Who uses SIEM?

We have customers that range from small enterprises with more limited budgets and operational capabilities, to large, complex multinational organisations. Our current customers are represented in wide variety of industries such as telecommunications, finance, energy, defense, government, healthcare and many more.
